

ALEXANDER PATSALIDES

SOFTWARE ENGINEER (BACKEND & DATA SYSTEMS)

+357 99238320 alexp.213@hotmail.com Larnaca, Cyprus [linkedin.com/in/patsalidesalexander](https://www.linkedin.com/in/patsalidesalexander)

ABOUT

Software Engineer (Backend & Data Systems) with 3+ years of experience specializing in low-latency C development and high-availability data infrastructure. Proven track record of managing enterprise pipelines at Amdocs and currently transitioning expertise into Go (Golang) to build scalable, secure fintech platforms.

SKILLS

Languages: C/C++, SQL (Oracle, PL/SQL, Snowflake), Shell Scripting
Version Control: Git, Perforce (P4)
Tools & DevOps: Docker, Jenkins, CI/CD Pipelines, Unix/Linux environments

WORK EXPERIENCE

Amdocs Ltd | Limassol, Cyprus

Data Engineer • 03/2025 - Present

- System Reliability: Manage and monitor enterprise data pipelines to ensure 99.9% High Availability and data integrity.
- Incident Response: Troubleshoot complex infrastructure issues and automate monitoring processes to reduce system downtime.
- Cloud & Modernization: Contributing to the transition of legacy data processes toward Azure Data Lake and Snowflake environments.

Software Developer • 05/2022 - 03/2025

- Backend Engineering: Developed and optimized low-latency software using C, Pro*C, PL/SQL and Oracle SQL within a Linux environment.
- Version Control Management: Utilized Perforce for managing large-scale enterprise codebases and maintaining release integrity.
- Quality & Mentorship: Conducted technical code reviews and trained two new engineers on build procedures and unit testing frameworks.

PROJECTS & SPECIALIZATIONS

Financial Payment Platform

- Engineered a desktop application using Windows Forms and Microsoft SQL Server to manage secure payment processing and database transactions

EDUCATION

Bachelor of Science in Computer Science

European University Cyprus • 09/2016 - 06/2021

- Relevant Coursework:**
 - Data Structures and Algorithms, Databases, Operating Systems, Computer Networks, OpenGL with C++.

CERTIFICATIONS

Certified Professional - DevOps Foundation (CP-DOF)

- CI/CD & Automation: Implemented automated build/integration practices using Maven and Jenkins.
- Infrastructure as Code: Applied containerization principles and managed infrastructure using Docker and Ansible.
- Quality Assurance: Configured automated testing and static code analysis using JUnit, Selenium, and PMD.
